## Cloisonné

Cloisonné shares the originality from the metal enamelware in ancient China, which is one the most valuable culture heritages in the world. Cloisonné is made by traditional wire inlay technology. The pictures are composed on the base of metal material. Modern technology and color matching technique have been applied in the picture's main tone and base color. It is crystal-clear with the effect of three dimensions. Simple but impressive, the pictures demonstrate the sophisticated meaning.
